**ADDENDUM 1- JPS RFP # 1010506 -**  
**GT10 Rotor Replacement**

The purpose of this addendum is to provide feedback to queries received regarding this RFP. Note the queries as well as JPS' feedback (in blue) below:

1. Can you confirm intended terms of delivery – normally our offers include shipping terms that call for shipping by JPS. Please confirm this is acceptable.

**Ans: Yes, this is acceptable – please clearly state applicable shipping terms in your proposal.**

2. It would be our intention to make the Rotor available for shipment inside a specially designed Frame 6 Rotor Pod, would you want this to become the property of JPS or can we arrange for collection and have it returned to our warehouse

**Ans: Include the cost to (optionally) procure the Rotor Pod as a separate line item in your proposal.**
